**4 FIRST AID MEASURES**

**Inhalation:** Remove to fresh air. If not breathing, give mouth to mouth resuscitation. If breathing is difficult, oxygen should be administered by qualified personnel. Call a physician or transport to a medical facility.

**Skin Contact:** Wash off in flowing water or shower.

**Eye Contact:** Irrigate immediately with water for at least 5 minutes. Seek medical attention.

**Ingestion:** Do not induce vomiting. Call a physician and/or transport to emergency medical facility immediately.

**5 FIRE FIGHTING MEASURES**

**Flash Point:** 80F (27C)  
**Flash Point Method:** PMCC  
**LEL:** 1.1% based on Xylene  
**UEL:** 7.0% based on Xylene

Extinguishing Media - Foam, Dry Chemical, Carbon Dioxide (CO<sub>2</sub>)

Fire and Explosion Hazards - Presence of xylene requires grounding. Keep away from possible ignition sources.

Fire Fighting Equipment - Wear positive pressure self-contained breathing apparatus.

**6 ACCIDENTAL RELEASE MEASURES**

**If Material is Spilled** - Soak up in absorbent material such as sand and collect in suitable containers. Residual resin may be removed using steam or hot soapy water. Solvents are not recommended for cleanup unless the recommended exposure guidelines and safe handling practices for the specific solvent are followed. Consult appropriate solvent MSDS for handling information and exposure guidelines. Keep spark producing equipment away. For large spills, evacuate upwind of spills and contain with dike.

**7 HANDLING AND STORAGE**

**Handling Precautions:** General Handling: Keep away from heat, sparks and flame. Avoid prolonged or repeated contact with skin. Avoid contact with eyes, skin, and clothing. Avoid breathing vapor. Do not swallow. Keep container closed. Use with adequate ventilation. Wash thoroughly after handling. Never use air pressure for transferring product. No smoking, open flames or sources of ignition in handling and storage area. Vapors are heavier than air and may travel a long distance and accumulate in low lying areas. Ignition and/or flash back may occur. Electrically bond and ground all containers and equipment before transfer or use of material. Containers, even those that have been emptied, can contain vapors. Do not cut, drill, grind, weld, or perform similar operations on or near empty containers.

## U-498 Part A

**Storage Requirements:** Minimize sources of ignition, such as static build-up, heat, spark or flame. Store in original container. Keep container tightly closed.

<b>8</b>	<b>EXPOSURE CONTROLS/PERSONAL PROTECTION</b>
----------	--

**Engineering Controls:** Provide general and/or local exhaust ventilation to control airborne levels below the TLV.

**Personal Protective Equipment:** Respiratory protection: Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multi-purpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Hand protection: Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching gloves outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.

Body Protection: impervious clothing. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

Eye protection: Tightly fitting safety goggles. Faceshield (8-inch minimum). Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

Hygiene measures: Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.

<b>Appearance:</b>	Gray	<b>Odor:</b>	Solvent odor
<b>Physical State:</b>	Viscous liquid	<b>Solubility:</b>	Negligible in water
<b>Spec Grav./Density:</b>	1.3-1.45	<b>Percent Volatile:</b>	30-40

## 10 STABILITY AND REACTIVITY

<b>Chemical Stability:</b>	This product is stable
<b>Conditions to Avoid:</b>	Xylene may produce excessive pressure when heated.
<b>Materials to Avoid:</b>	Bases
<b>Hazardous Decomposition:</b>	The by products expected in complete pyrolysis or combustion of epoxy resins are mainly phenolics, carbon monoxide and water. The thermal decomposition products of epoxy resins therefore should be treated as potentially hazardous substances, and appropriate precautions should be taken.
<b>Hazardous Polymerization:</b>	Will not occur by itself, but masses of more than one pound of product plus an aliphatic amine can cause irreversible polymerization with considerable heat buildup.
